1st Green Lab Symposium
23.11.2020

How does Swiss research stay competitive and how will it become CO₂ neutral in the future?

Lab buildings consume up to 10 times more energy than other buildings.

Do you have a dedicated strategy to manage energy consumption and to reduce the environmental footprint of your labs?

The boundary conditions for R&D are changing dramatically. The current concepts and solution do not meet future requirements.

Do you want to get to know promising concepts and solutions for your future?

Automation and digitalization will have ad most importance for R&D and your laboratory.

Do you want to see how digitalization will be the new foundation for the entire lab infrastructure and R&D processes?

Collaboration cross all disciplines is the result of the required cultural change in design, implementation and operation of future labs

Do you want to be part of this collaboration and drive it actively?

Join the 1st Green Lab Symposium and act actively!

Agenda

Draft

- 08:30 Welcome from Green Building Switzerland
- 08:35 Agenda and program
- 08:40 Trends for Labs of the Future
- 09:00 Case Study "Research Campus Switzerland"
- 09:20 Case Study "UCL London"
- 09:40 Case Study "Lab of the Future"
- 10:00 Break
- 10:30 Panel Discussion
- 11:15 Federal Ministry of Energy's expectations on Labs
- 11:35 SUVA's view on safety of the Lab of the Future
- 11:55 Technical solutions for flexible labs
Why is digitalization the foundation for the lab of the future?
- 12:15 Break
- 12:35 Break
- 13:30 Panel Discussion
Interactive Workshops (Safety, Flexibility, Sustainability)
- 14:15 Break
- 15:00 Workshop presentations
- 16:00 Wrap up, Vote on priorities, next steps, Feedback
- 16:30 The end

R&D is changing, don't be left behind

The Green Lab Symposium is the first laboratory symposium in Switzerland, for Switzerland. Our aim is to break down thought structures and create a platform for active exchange.

There will be keynote presentations on the current state of research and future perspectives. In addition, specialist presentations will highlight the needs of the various stakeholders such as researchers, users, planners, architects, investors, equipment suppliers, safety and maintenance specialists, authorities and energy suppliers.

Furthermore, interactive workshops on specific topics are offered for a creative solution finding process.

As you can see, the Green Lab Symposium 2020 is a unique networking opportunity in Switzerland with like-minded people. So bring your challenge and let the ideas of others inspire you!
